

flos:acoustics

FS SC8

: product card

Flos acoustic panels and screens fulfil three important functions: soundproofing, dividing space, and aesthetics. All Flos furniture is united by a flowing shape line that expresses peace and harmony.

collection advantages

acoustic walls

The distinctive, flowing contour line is inscribed into one of the sides of the panels and acoustic walls. The use of both individual screens and those put together allows the creation of coherent functional layouts and offers a wide range of arrangement possibilities

silent connection

Connectors make it possible to connect two screens (in a straight line and at angles of 90 and 135). The connectors can only be used for screens with a straight side (no wave-side connection possible).

handy top

Acoustic walls can be optionally equipped with a top (available in two heights).
